SUMMARY

I'm a Web Developer working in Javascript, React.js, Node.js, Express, MongoDB, jQuery, CSS, HTML, Ruby on Rails, and Github. I have experience in agile development and REST conventions.

I used to work in finance as a Project Manager and a Retirement Plan Consultant at Transamerica. Being a Project Manager taught me to lead and set expectations for a group of executive contacts, multitasking dynamic priorities while meeting deadlines, dealing with demanding clients in a calm and professional manner, and communicate effectively with people who have different technical competences.

Currently, I'm working on building a full stack web app with MongoDB, Express, React.js, Node.js, JSX, HTML, and CSS.

TECHNICAL SKILLS

Javascript	React.js	Node.js	Express	MongoDB	jQuery
Ruby on Rails	PostgreSQL	CSS	HTML	Github	Mongoose
Mongoose	JSX	Materialize	Bootstrap	REST	

PROJECTS

Alien Sweeper

- A minesweeper game that has multiple difficulties, can place flags, and has media inputs.
- Built using JavaScript, HTML, and CSS in a 4 day sprint.

Divide and Costco

- Divide and Costco is an app that allows Costco shoppers to connect for savings. It allows two customers to connect shopping lists to split large quantity products. That way they reduce waste while also saving money on the items they need.
- Built as a team utilizing the Yelp and Google Map API's, Node.js, Express, HTML, and CSS in a 5 day sprint.

Lets Work

- Lets Work is an app that allows an employer/manager view and update employee shifts for their own record.
- Built using MongoDB, Express, React, Node.js, JSX, HTML, and CSS in a 5 day sprint.

Whatcha Think

- A survey app that allows an admin to create custom surveys and view all answers submitted by non admin users.
- Built using Ruby on Rails, HTML.ERB, CSS, SQL, and Materialize in a 5 day sprint.

EXPERIENCE

Transamerica, Los Angeles, CA

2013-2017

Retirement Plan Consultant, 2015 – 2017

Installations Project Manager, 2013-2014

Managed a book of business of over 150 plans – total assets exceeded \$1,000,000,000. Advised client executives, financial advisors, and third party record-keepers of each plan on all ongoing issues and questions.

- Helped update department procedure to reduce redundancies and increase productivity. Our team was able to handle more clients while reducing errors and time needed for QA.

EDUCATION

California State University Northridge, Bachelor of Science in Finance, Northridge, CA

General Assembly, Web Development Immersive, Los Angeles, CA
